Product Description

Products Introduction of the Silver Polished Stainless Steel Garden Lantern

Silver Polished Stainless Steel Garden Lantern is our self-designed product. Because we have our engineer department and mold department, OEM service are welcomed.

The stainless steel garden lantern is made of stainless steel and tempered glass. For the stainless steel, we use SS430 which is around 0.7mm thickness to make it. For some components we will use different thickness of the stainless steel because of the construction requirement. For the glass, we use the tempered glass, which is around 2.6mm thickness. And for the round glass tube, we use 2.5mm borosilicate glass tube. This is why our quality is better than others.

There are many colors for you to choose, such as silver, gold plating, black power coating, white power coating and so on. And the stainless steel lantern has different sizes, they are suitable for outdoor parties, wedding parties and indoor decorative.
